PROJECT EXPERIENCE

FRENCH GULCH TRAVEL SHED **BRECKENRIDGE, COLORADO (COMPLETED)**

Charlier Associates completed a multimodal alternatives analysis for the French Gulch Travel Shed. The French Gulch Travel Shed is composed of three primary neighborhoods on the northeast side of the Town of Breckenridge. With the development of an additional 200 housing units, the Town sought to explore options to mitigate the increase in residential and construction traffic generated from such developments. CAI developed a list of alternatives which ranged from “do nothing” to implementing traffic control devices and to creating a new roadway with a separated bicycle and pedestrian pathway.

Client: Town of Breckenridge
Contact: Eric Guth, Town Engineer (970) 453-3164
