PROJECT EXPERIENCE

TRANSIT DESIGN GUIDELINES MANUAL

RTD Denver, Colorado (completed)

As a subconsultant to HNTB Corporation, Charlier Associates helped the Denver region's transit agency, RTD, develop an urban design guidelines manual. The manual provides recommended designs and templates for private site plans and public infrastructure intended to support transit access and pedestrian circulation.

CAI completed a case study analysis of a "built" subdivision, identifying urban design strategies to improve access and mobility in existing suburban areas. The case study was funded by a state grant and constructed.

CLIENT: Regional Transportation District (Denver)
