PROJECT EXPERIENCE

TRANSIT SERVICES ACTION PLAN

Fort Collins, Colorado (completed)

Charlier Associates, as sub consultant to LSC Transportation Consultants, completed a transit services action plan for Larimer County, Colorado. Key project tasks included an analysis of the current structure for funding and operating transit services in Larimer County; a comparison of how other counties in Colorado provide and fund transit services; and structured interviews with elected officials, staff, transit service providers and others to determine local opinion on the role the County should play in regards to transit and transportation. The project resulted in a transit services action plan that includes recommendations on organizational structure, decision-making process, funding and other key transit issues. The findings of the project have also been included in the regional transit plan being completed for the North Front Range area.
