

TRAIL MAPPING SERVICES

CITIES OF ARVADA, NORTHGLENN, THORNTON AND WESTMINSTER (ON-GOING)

The City of Arvada is leading an effort to develop a map of existing trail facilities adjacent to major waterways. The map will act as a catalyst for discussion between local communities and ditch companies. CAI is working directly with the Cities of Arvada, Northglenn, Thornton and Westminster to integrate trail datasets into the regional GIS base layers provided by Denver Regional Council of Governments (DRCOG). The final product will be a planning map that identifies existing facilities and potential corridors that could link the communities together.

Client: City of Arvada

Contact: Joe Eads, Senior Landscape Architect (303) 421-2550 x3269
