

# Charlier Associates, Inc.

## PROJECT EXPERIENCE

### PEARL AVENUE IMPROVEMENT PROJECT JACKSON, WYOMING (COMPLETED)

Charlier Associates worked with a team of consultants to develop a corridor design concept for this important local street in Jackson. Charlier Associates, Inc designed, hosted and reported the results of a four-day design charrette involving property owners, business owners, town planning board, town council and the general public in development of a comprehensive improvement plan for Pearl Avenue. The Pearl Avenue corridor functions as both a local and a tourist street providing access to several hundred motel rooms and other guest accommodations, dining establishments and retail shops. The corridor includes several major destinations for local trips such as the Jackson State Bank and the Post Office. The plan generated from the design charrette increased pedestrian mobility and safety and provide improved transit functionality while supporting safe automobile circulation.

Client: Town of Jackson  
Contact: Sandy Buckstaff, former Town Engineer, Town of Jackson (307) 733-2087
