

### **TOWN OF JACKSON, WYOMING DOWNTOWN PLAN** **JACKSON, WYOMING (COMPLETED)**

*CAI recently completed a strategic plan for the downtown core area in Jackson, Wyoming. CAI worked closely with the Jackson Downtown Advisory Committee, elected officials from the town and Teton County, local interest groups, and the general public to develop the plan. The plan will provide recommendations on parking, traffic and land development issues. As part of the project CAI has conducted the following:*

- *comprehensive inventory of parking spaces in and outside the core area of downtown;*
- *a 3-day parking study that observed duration, turnover, and utilization for over 900 core area parking spaces; and*
- *traffic analysis and projections based on existing count data and anticipated development in the core area*

*Next steps in the project include:*

- *Detailed parking recommendations that increase the utilization of the existing supply and plan for future parking needs; and*
- *Proposed changes to the parking requirements in the Town's Land Development Regulations*

*Client: Town of Jackson*
