Bike Links 36: A three step processBike Links 36: LessonsBike Links 36 in Action: City and County of Broomfield Trails

Broadway Boogie - Boulder

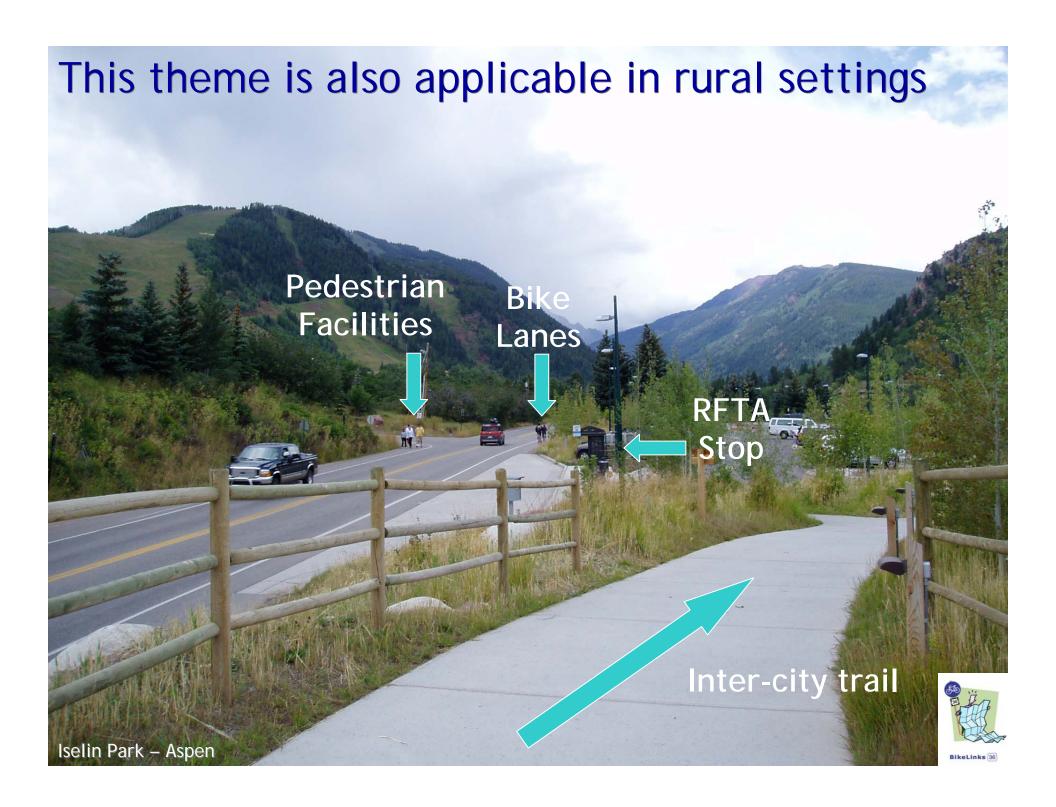

### 2005 Colorado State Trails Symposium Theme

DASI

Developing inter-city trails as a means of revitalizing economically distressed regions, strengthening local and state tourism and promoting alternatives to auto-based commuting.

Dash – Lafayette to Boulder

Bike Links 36: A three step process
Step #1: Open the process to everyone
Step #2: Map existing trails
Step #3: Identify missing links

## Bike Links 36 History

- Map bike facilities in the US 36 corridor from Boulder to Westminster
- Plan future trails in the corridor
- Participation was voluntary and cost for project was shared
- 1 year timeline
- Team effort to win a GOCO grant
- Create a planning tool for all agencies

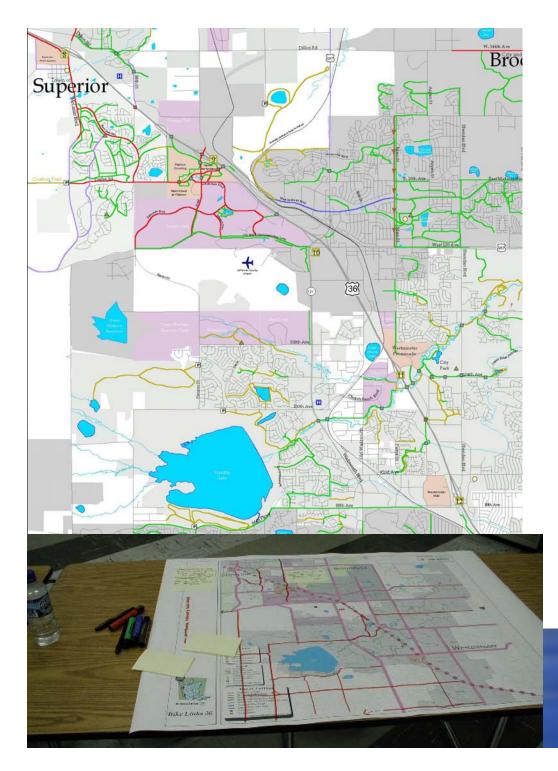

# Step #1: Open the process to everyone Engage the public in a creative process

#### The BIKE LINKS 36 Project Advisory Committee is pleased to invite you to attend one of two public workshops being held to seek input on development of a bicycle facility map for the US 36 Corridor. Input is needed regarding bicycle routes, missing links and map layout. Public Workshop #1 Public Workshop #2 Wednesday Thursday November 28th November 29th 4:00-7:00 pm 4:00-7:00 pm **Burbank Middle School Recreation/Senior Center** Cafeteria Lakeshore Room **290** Manhattan Drive 280 Lamar Street Boulder Broomfield Both meetings are OPEN HOUSE format, so come when you can! For additional information and directions: www.us36tmo.org Lissa Morgan, US 36 TMO (303) 439-8526 lissa.morgan@us36tmo.org BikeLinks (36

# Classify for purpose?

Use GIS as a mapping tool
Work with stakeholders on classifications
Define the final product after classifying

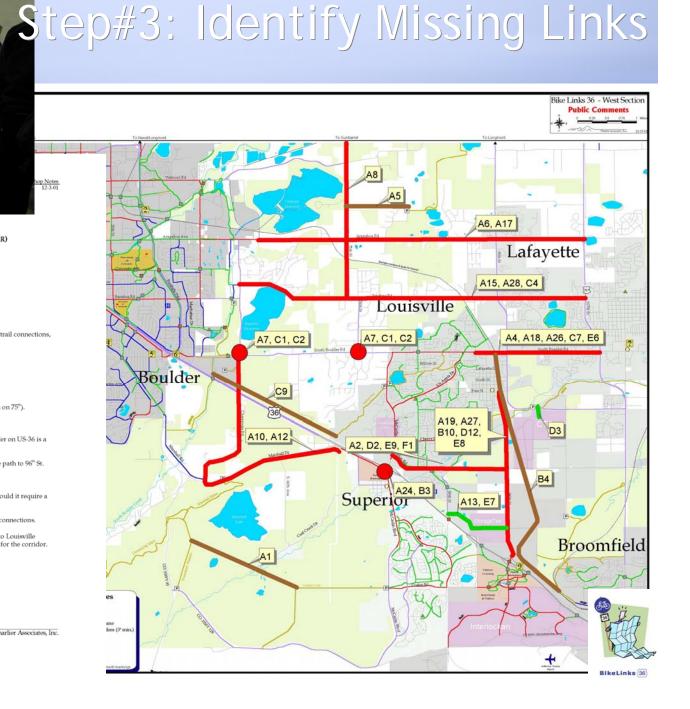

PUBLIC COMMENTS NOVEMBER 28, 2001 - BURBANK MIDDLE SCHOOL (BOULDER)

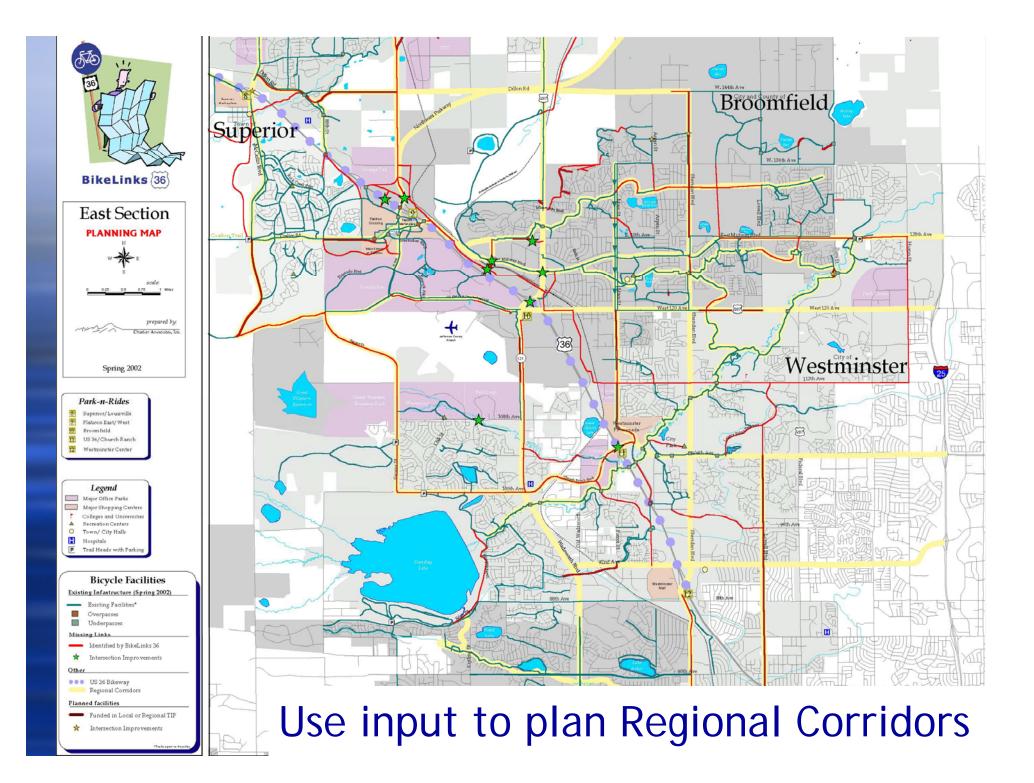

#### A. Station #1 Missing Links - West Section

- 1. I'd like to be able to bike from Coalton to Eldorado.
- 2. Dillon Road between McCaslin Blvd. and 88th St. needs connection for Bike Lanes.
- 3. 96th and Independence Road needs bike lanes.
- 4. South Boulder Rd. Louisville to Lafayette no on-street bike lane markings, lacking trail connections, limited to on-street.
- 5. Link 75th Street to the soft surface path located directly to the east.
- 6. There is no shoulder on Arapahoe Road and 95th Street.
- 7. There are missing links and conflicts with right turn lanes on S. Boulder Rd.
- 8. Missing Link (Bike lane) on the Northeast corner of Arapahoe and 75th (going north on 75th).
- 9. No more bike paths in a squiggle shape (need direct routes).
- 10. The Marshall Drive route is a good existing route but the connection to the shoulder on US-36 is a missing link.
- 11. Dillon Road: No good way to connect from Coal Creek Trail. Also need Multi-use path to 96th St.
- 12. Marshall Road: add shoulders from Cherryvale to US-36
- 13. Corridor through Storage Tek would be a great route. But is it a private street? Would it require a grant authorization?
- 14. US-36 is a major barrier between communities to north and south, very few good connections.
- 15. I would like to have a facility connecting Baseline Road east of Baseline reservoir to Louisville reservoir. 76th to Louisville reservoir is county open space and a power line exists for the corridor.
- 16. I commute on McCaslin and would like more connecting facilities.
- 17. Arapahoe Road, add bike facility to extend east to 287.
- 18. Missing link: S. Boulder Road and 95th Street

### Building <u>relationships</u> to <u>leverage resources</u> for the completion of the overall trail system

# •Community trail planning

•Trail systems in proposed private sector developments

 Intergovernmental trail planning

# **Community Trail Planning**

### **BT4: 14<sup>TH</sup> AVENUE TO COUNTRY ESTATES PARK**

#### **PROPOSED LOCATION:**

14<sup>th</sup> Avenue east of Main Street to Community Ditch, and Community Ditch to Aspen Creek Park

SURROUNDING LAND USES:

Single Family Homes

**CURRENT SURFACE:** 

Asphalt and Soft Surface

### **RECOMMENDED FACILITY:**

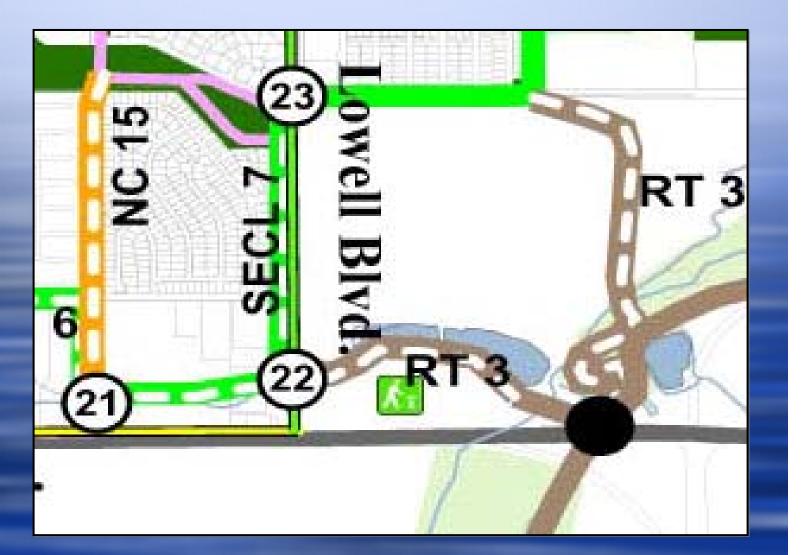

Signed bicycle route on 14<sup>th</sup> Avenue and 10' concrete pathway plus jogging strip on the ditch corridor with appropriate wayfinding, regulatory signage (see intersection improvements #16 and #34).

Provide a signed bicycle route on 14<sup>th</sup> Avenue to the community ditch corridor and a paved connection on the community ditch corridor to Aspen Creek Park.

### Southeast Corridor Trail – Missing Link

BikeLinks (36)

### **Trail Systems in Private Sector Development**

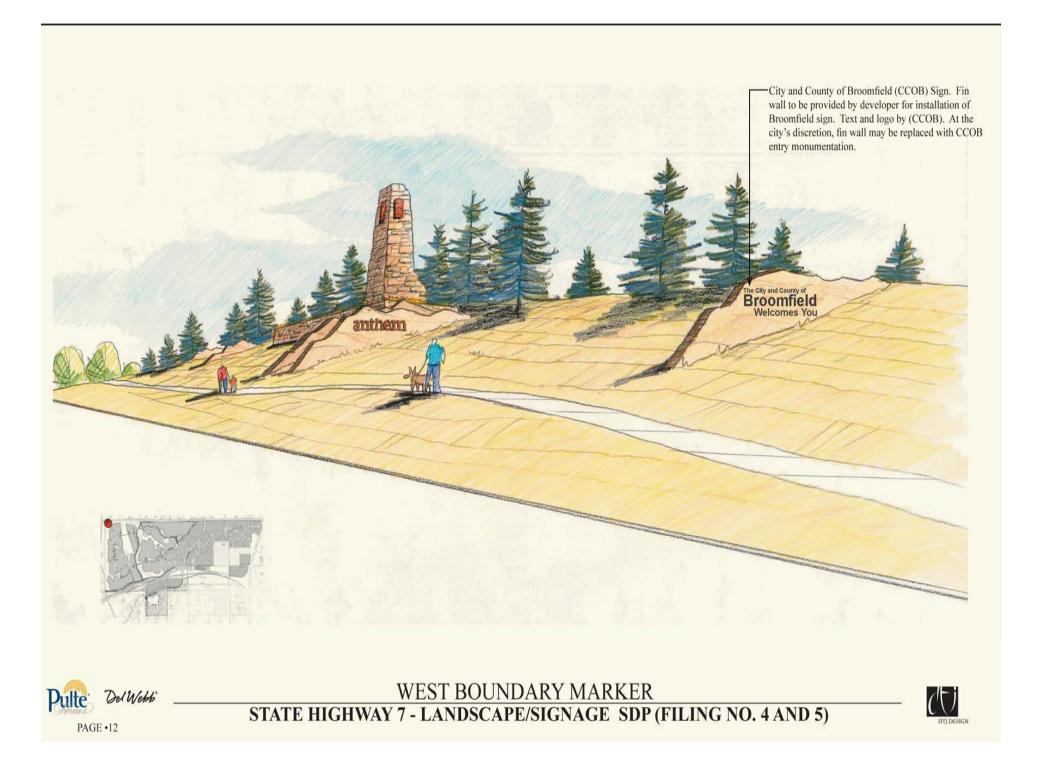

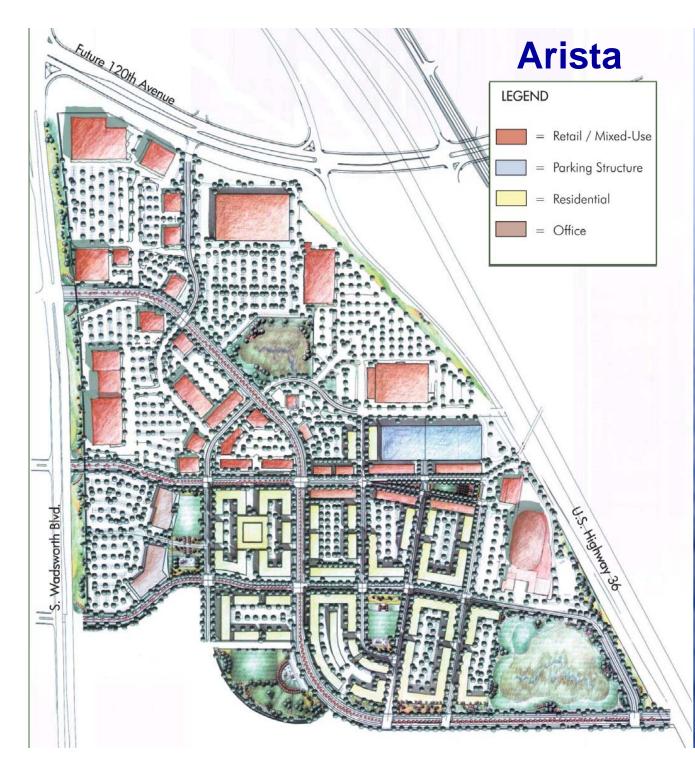

Anthem-State Highway 7 Regional Trail (3.5 miles)

 Connections to: Lafayette, Erie, Coal Creek Trail, Rock Creek Trail, and I-25

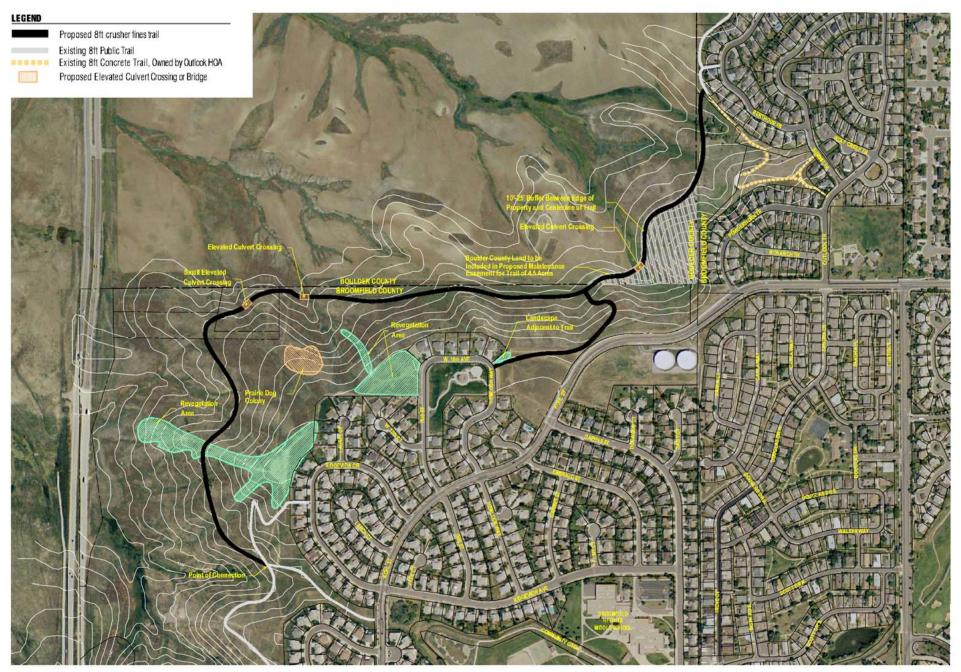

• US 36 Bike Expressway
• US 36 EIS, Wadsworth EIS
• Active Living/Transit Oriented Development

## Intergovernmental Trail Planning

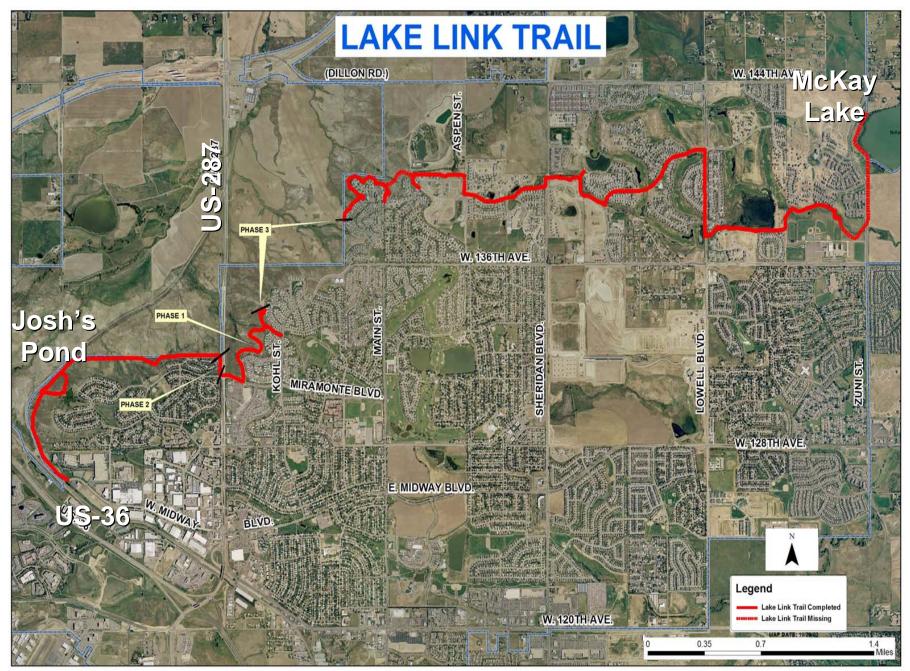

**Broomfield Trails: Ridgeview Trail Phase III**
