

Charlier Associates, Inc.

PROJECT EXPERIENCE

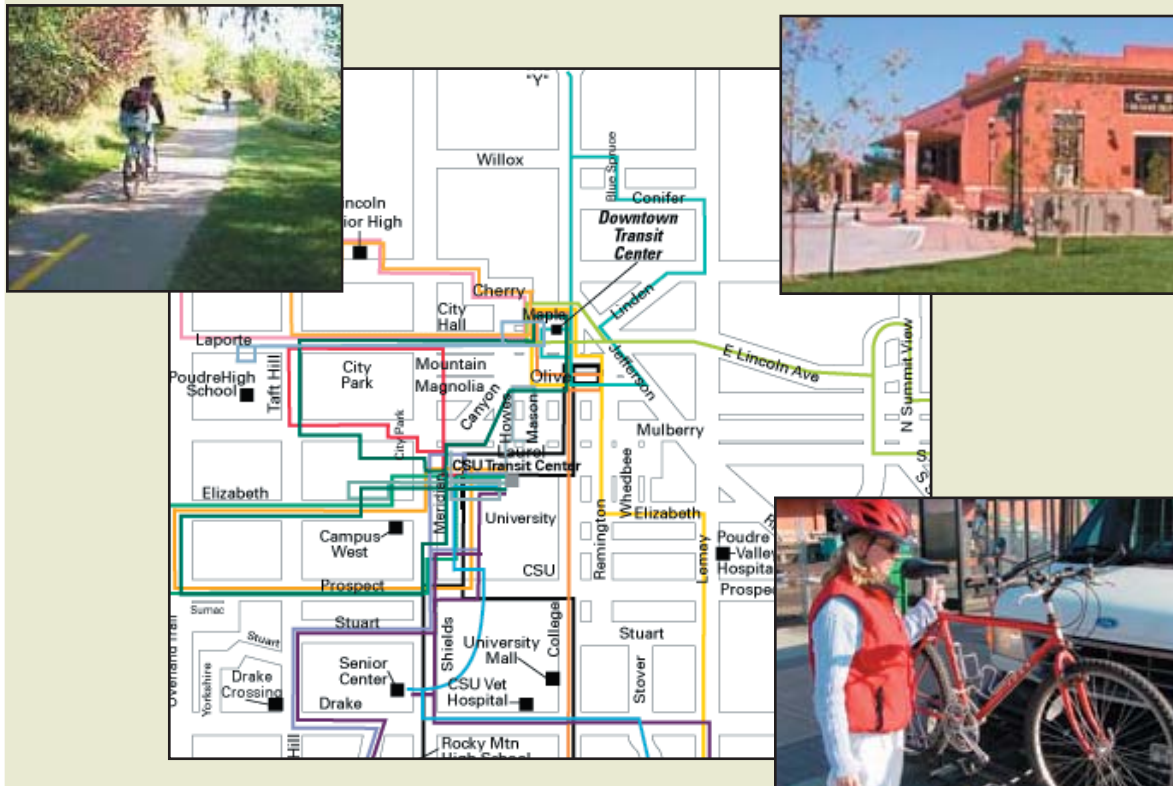

MASTER TRANSPORTATION PLAN

CITY OF FORT COLLINS, COLORADO (COMPLETED)

Charlier Associates prepared a comprehensive transportation plan for the City of Fort Collins including an update of the master street plan, a transit system plan, an urban design strategy and a multimodal level of service criteria manual. The Plan was closely coordinated with the City's comprehensive plan and addressed access issues to Colorado State University. The multimodal level of service criteria manual created for the project currently serves as the basis for development review in the City.

Client: City of Fort Collins
