

# Charlier Associates, Inc.

## PROJECT EXPERIENCE

### DOWNTOWN ENHANCEMENT AND PEDESTRIAN PLAN

Aspen, Colorado (completed)

Charlier Associates helped the City of Aspen undertake a comprehensive review and design analysis of its downtown streets, sidewalks, alleys and transit services with a particular focus on enhancing the pedestrian environment. The City has been committed to a walkable downtown for over 30 years and is known throughout the world for its pedestrian malls and downtown parks. CAI identified issues and opportunities related to downtown mobility and accessibility and recommended pedestrian and transit improvements and design guidelines for the downtown core. The transit and pedestrian improvements recommended by CAI have been fully and successfully implemented.

CLIENT: City of Aspen
